| <p>The Issue Lowering the Cost of Compliance and Traceability</p> | <p>“Today’s manufacturing companies are taking a broad view of compliance, using it as an umbrella term for all aspects of governance, risk management, and regulatory compliance and traceability. This is becoming particularly evident for food and beverage process manufacturing companies, which must not only abide by these fiscal regulations but also adhere to strict regulations concerning the manufacture and distribution of their products” says David Forrest, Chief Executive, Percipient.</p> |

Oracle Accelerate Solution for Food and Beverage

Percipient is the Right Partner for your Food and Beverage Solution

E-Business Suite Accelerate Solution implemented, in as little as 3 months. Fixed Price, Fixed Scope.... No Risks.

The Oracle Accelerate Solution for Food and Beverage will provide the following key functionality:

Why do Mid-Size Businesses choose Oracle?

- Industry-focused solutions to meet your unique requirements
- Complete solutions to meet your needs today and tomorrow
- Easy-to-own solutions with predictable value

• Easy to Use – Preconfigured Oracle Software

The Oracle Accelerate Solution for Food and Beverage is tailored for the Food and Beverage industry to enable 27 unique business processes with industry-relevant data across 36 modules. The Food and Beverage Oracle Accelerator will setup and configure the system based on entries specified within the setup questionnaire. Additionally, customers can add, modify, and expand the entire footprint as their business scales, yet achieve very fast results by selecting the industry specific business transactions they need.

• Industry Complete – Industry Best Practices and Supporting Business Flows for Process Manufacturing.

These are models of business transactions representing leading business practices. Business flows enable the customer to relate their business requirements to the E-Business Suite functionality. Flow models, videos, demo scripts and other material are provided to increase end-user awareness and understanding.

Key Business Processes Enabled include:

- Financials
- Process Manufacturing
- Distribution and Logistics
- Sales and Channel Management

• Easy to Implement – Rapid Deployment

Deploys common business transactions in Oracle E-Business Suite, dramatically speeding up the initial stages of an implementation. Implementers can enable customers to begin testing personalized business transactions within hours. This allows implementers to spend more time on additional value-added activities, and ultimately increases the return on investment for the customer.

Project Quality Plan - provides an implementation plan detailing critical deliverables, documentation and review schedules.

Functional Workflow Specifications and System Acceptance Test Specifications

- provides documentation on the business workflows and test plans and scripts, which can be used to validate and certify the solution.

Education and Knowledge Transfer - provides utilities to test, train, and educate individual business users.

Percipient and Oracle

Doing more with less and quickly adapting to changing business demands are not just goals; they are organizational imperatives. Every step made toward increased business efficiency and agility in the marketplace must have a direct impact on the bottom line and provide a solid return on investment.

Percipient and Oracle are aligned to help businesses address these challenges. Together, we have the products, services and experience to deliver enterprise-wide information and IT adaptability, and the track record to prove it. Having long been recognized as a leading technology innovator, Oracle’s integrated suite of applications can provide companies with immediate access to complete, high-quality and compliant business information.
