SAGE BUSINESS APPLICATIONS:

Enhance your Sage software with industry leading apps that help you do business better.

BETTER BUSINESS VISIBILITY

Save time and manage your resoures intelligently with a range of connected apps that work perfectly with your Sage software to analyse, strategise and make the most of every opportunity.

By integrating Sage Intacct and Sage X3 with other cloud-based software, you can extend the already world-class accounting functionality even further, to transform your organisation. From payments and payroll, to reporting and forecasting, choose from 100+ business apps and cloud solutions that automate processes, drive business efficiencies and make change easier.

For a full list of available business applications, visit the Sage Intacct Marketplace or the Sage Business Cloud Marketplace.

Application	Prophix
Function	Budgeting & forecasting
Overview	Single solution for budgeting, forecasting, reporting, analytics and financial consolidation. Prophix helps to automate financial and operational processes, reducing reliance on Excel to provide the insight to perform business critical functions.
Benefits	• Improved budget accuracy with data pulled directly from your GL • Drill further into your data for a detailed analysis of your performance • Consolidate multiple data sources for improved forecasting across departments • Achieve an integrated platform for planning across finance, operations and marketing
Product	Sage Intacct & Sage X3

Application	Sage Enterprise Intelligence
Function	Actionable analytics & business intelligence
Overview	A simple solution to access data in a self-sufficient manner, eliminating the need for disparate tools and specialised skills. SEI helps to reduce the time spent on analysis and reporting for faster, better informed decision making.
Benefits	• Empower users to analyse and report on data in a self-service manner • Reduce time spent on analysis and reporting for faster decision making • Gain a clear picture of your whole business and develop departmental collaboration • Intuitive BI tool eliminating the need for disparate tools and specialised skills
Product	Sage X3

Application	Yooz
Function	Accounts payable & invoicing
Overview	A smart and powerful cloud-based Purchase-to-Pay (P2P) automation solution. Yooz leverages AI and RPA technologies to deliver an amazing level of automation with extreme simplicity, traceability and end-to-end customisation features.
Benefits	• Completely paperless accounts payable • Supplier participation and enablement • Same day invoice approval • Ability to capture available early payment discounts • Mobile access to invoice approval and communication
Product	Sage Intacct & Sage X3

> The synergy between Credit Hound and Sage X3 has improved Percipient's cash flow and has significantly reduced our debtor days for the financial year. It has provided us with an overall accounting solution that really is second to none.

Application	Credit Hound
Function	Advanced credit control
Overview	Powerful credit control software which helps to reduce late payments. Credit Hound significantly reduces administrative tasks and instantly shows you how much you're owed and who you need to chase.
Benefits	• Improved cash flow thanks to a pro-active accounts receivable approach • Automated workflows ensure customers are chased at the most appropriate time • Improved time management through the automation of the collections process • Reduced debtor days with a pro-active chasing cycle • A faster return on investment thanks to improved cash flow and working capital
Product	Sage X3

Application	Spindle Document Distribution
Function	Electronic invoicing & EDM
Overview	Spindle Document Distribution gives you the tools to process your paperwork faster. Instantly saving you time and money by streamlining your business processes and improving efficiency.
Benefits	• Reduce human error in processing, sending, receiving and filing documents • Save time with a quicker document delivery and file retrieval • HMRC compliance with digital delivery and storage • Reduce the risk of missing or lost documents • Reduce manual admin
Product	Sage X3

Application	Certify
Function	Travel & expense reporting
Overview	The leading travel, invoice and expense report management solution. Certifiy automates manual tasks with immediate visibility and better control of spend across your organisation.
Benefits	• Create, submit and approve expenses automatically from your phone or desktop • Robust reporting and compliance controls • Keep travel spend within policy • Digitise the produce-to-pay process from initial recognition to integration • Simplify vendor management and fast-track invoice processing cycles
Product	Sage X3

Application	Datalinx
Function	Barcoding & warehouse management
Overview	Managing business processes from the moment product arrives, through all transactional movements, to packaging and dispatch. Datalinx WMS provides real-time information, enabling increased efficiencies and optimisation for multiple industry verticals.
Benefits	• Increased stock location accuracy and picking speed by 25% • Automatically record quantities and location across multiple bins • Boost productivity by eliminating duplicate and manual data entry • Minimise errors and boost throughput of individual pickers • Improve customer service through increased order accuracy and stock availability
Product	Sage X3
