 DATASHEET

SAGE INTACCT FOR CARE HOMES

Automate your financial processes, and gain instant visibility and control of your healthcare business finances, for confident decision-making that will boost efficiencies.

Care homes are under constant pressure to deliver higher standards of care, with fewer resources. At a time when you need total operational visibility and financial control the most, reliance on outdated back office systems and manual processes can really hold you back.

Sage Intacct is a comprehensive accounting solution that combines, clinical, financial, and operational data to enable faster, more informed decision-making, reduce manual input, and create efficiencies that improve margins and increase revenues.

WHY CHOOSE SAGE INTACCT?

- Implementation in as little as 9 weeks
- +70% reducing time to close
- 100 entities consolidated in seconds
- 50 billion + financial records
- 250% ROI
- <6 months payback
- +65% productivity improvement

MUST HAVE FINANCE FEATURES

COST CONTROL & BUDGETING

When margins are tight, controlling costs is paramount. Sage Intacct's robust reporting capabilities enable you to drill down by location, item, cost drivers and more in a matter of minutes. Every transaction within the system is tagged with dimensions, so you can easily sort, filter, view, and report on the specific information you need. By reducing complexities and making your data current, you can manage your budgets more effectively and forecast with confidence.

DASHBOARDS & REPORTING

Financial management software for care homes needs to have industry-specific functionality. This includes strong multi-dimensional reporting tools to enable full analysis by entity, home, resident, service, and fund. Sage Intacct's role-based dashboards feature visuals or critical metrics and accounting information to enable both financial and non-financial users, to easily acquire the answers they need at just a glance.

COMPLETE INTEGRATION

Sage Intacct is a cloud-based platform created to deliver multi-tenant financial management. It has an open API to provide an easy connection to existing and future third-party systems. This means you can leverage key data from electronic medical records, payroll, budget, CRMs and other systems to track critical KPIs. And because it's cloud-based, you don't have to worry about complicated or expensive upgrades, all your users have the latest finance technology at their fingertips, at the same time.

Sage Intacct healthcare customers have increased profitability by 30% with better insight for informed decisions, realised a 25% improvement in efficiency gains, and taken departmental reporting from 10 days to 10 minutes.
