 DATASHEET

## SAGE INTACCT FOR DENTAL PRACTICES

**Get the visibility you need to make better decisions and improve operational performance, so you can scale your organisation.**

From cost containment and multi-entity reporting to new billing models and service offerings, dental practices face an abundance of unique challenges. On-premise and out-of-date systems can leave you chasing your data and creating unnecessary workarounds that slow down your finance team and critical decision-making capabilities.

Sage Intacct brings financial proficiency around reporting, consolidations, and more, to enable dental practice and healthcare finance teams to regain control, automate processes, and focus on strategic decisions that will drive your business forward to deliver optimum patient care.

### WHY CHOOSE SAGE INTACCT?

- Implementation in as little as 9 weeks
- +70% reducing time to close
- 100 entities consolidated in seconds
- 50 billion + financial records
- 250% ROI
- <6 months payback
- +65% productivity improvement

# MUST HAVE FINANCE FEATURES

## DASHBOARDS & REPORTING

Financial management software for dental practices needs to have industry-specific functionality. This includes strong reporting tools with an advanced audit trail to track patient data, spend management, budgeting and planning. Sage Intacct's role-based dashboards feature visuals or critical metrics and accounting information to enable both financial and non-financial users, to easily acquire the answers they need at just a glance.

## MULTI-ENTITY MANAGEMENT

Healthcare financials can be a complex environment. Manual processes are a drain on finance team productivity and challenge the ability to make timely data-driven decisions across multiple entities and locations. Sage Intacct's core accounting capabilities solve these issues with a dimensional general ledger, continuous consolidation and the ability to drill down into the numbers across multiple entities, through easy-to-use reporting features and dashboards, with workflow automation and a solid audit trail.

## REAL-TIME VISIBILITY & INSIGHTS

Real-time visibility of financial and operational data is essential for busy dental finance teams, to make important on-the-fly decisions and to have the ability to examine their data at any given point in time, instantaneously. Sage Intacct's robust reporting capabilities enable you to consolidate and drill down by location, item, cost drivers and more in a matter of minutes. Every transaction within the system is tagged with dimensions, so you can easily sort, filter, view, and report on the specific information you need.

## COMPLETE INTEGRATION

Sage Intacct has an open API to provide an easy connection to existing and future third-party systems. This means you can leverage key data from patient records, inventory management, payroll, and other systems to track metrics that are central to your operations. And because it's cloud-based, you don't have to worry about complicated or expensive upgrades, all your users have the latest finance technology at their fingertips, at the same time.
