 DATASHEET

SAGE INTACCT FOR NON-PROFITS

Automate your core finance functions to free up time spent on admin, empower your workforce, and easily manage donations and funding.

Non-profit organisations face unique challenges - from compliance reporting to generating outcome metrics and providing real-time visibility.

Outdated, on-premise systems, can leave you chasing your numbers and creating unnecessary workarounds that slow down your operations and critical decision-making capabilities.

Sage Intacct's non-profit accounting software brings proficiency around reporting, automating and accelerating your finance function so you spend less time on lengthy administration tasks, and more time on what really matters to your organisation.

WHY CHOOSE SAGE INTACCT?

- Implementation in as little as 9 weeks
- +70% reducing time to close
- 100 entities consolidated in seconds
- 50 billion + financial records
- 250% ROI
- <6 months payback
- +65% productivity improvement

MUST HAVE FINANCE FEATURES

FUND ACCOUNTING

A common feature that non-profit organisations need is fund accounting. These are funds which a trustee of a charity needs to spend in a specific way or purpose as agreed when donated. Many non-profits receive hundreds of grants and directed donations in separate income streams, and donors rightfully want to know how their investments are being used. Sage Intacct fund accounting creates separate closes for each revenue source along with a regular series of specific reports, each with its unique requirements, for every funder.

SPEEDY CONSOLIDATIONS

Forget the headaches of spreadsheets and complex manual reconciliations. With push-button consolidations, our finance systems offer fast closings with real-time analytics – in minutes, not weeks – for maximum impact on your non-profit's performance.

DEEP INTEGRATION

Integration with existing systems such as donation platforms, fundraising tools, charity CRM and membership management software, is a modern necessity for charities needing to see the bigger picture when it comes to performance. Our cloud-based accounting solutions can help you to do just that. With integration into third-party applications as standard, you can gather, display and analyse all the key data that drives your organisation in a simple, standardised manner.

In our sector, transparency is everything, and with Sage Intacct, costs can easily be assigned to different services, and we can manage P&L, budgets and headcount with all of the figures literally at our fingertips.
