SAGE INTACCT
BENEFITS

STREAMLINE PROCESSES
Sage Intacct purchasing automates your organisation's unique workflows to streamline purchase requisitions, purchase orders, and approvals. It connects with Sage Intacct accounts payable, cash management, and inventory management - so you enter data only once - and enables you to attach files with drag-and-drop simplicity for easier record keeping and instant access to supporting documents.

IMPROVE VISIBILITY
Give your purchasing team at-a-glance access to critical, real-time information, so staff can focus on making the right decisions. Use customisable, role-based dashboards - which appear as soon as you open the application - to quickly check on budget to actuals, competitive quotes, price breaks, and more.

STRENGTHEN CONTROLS
Take control of your entire procure-to-pay process. Sage Intacct purchasing provides best practices templates to help ensure everyone complies with your purchasing requirements. Use these templates to create standard workflows and approvals for requisitions, quotes, returns, and more. Better still, you can customise them to suit your organisation's unique needs.
